

POWDERED MILK AND TOPPINGS 100% value

The quality of the raw materials, the composition of milk preparations and the technological process used guarantee the safety required once the machine is with the customer and offers a product of the highest quality. The main feature of VENDIN's milk preparations is the optimal particle size obtained through the company's exclusive manufacturing method.

Main benefits

- The product is 100% agglomerated to guarantee optimal functioning of the machine and avoid clogging problems.
- The raw materials are 100% European origin
- Dairy product 100%: healthy and sustainable
