

# Philippe Nigro

Il suono, così come la luce, se non è controllato e progettato con attenzione può diventare fastidioso, si trasforma in rumore a scapito della qualità di vita di un ambiente, per quanto bello possa essere. PRESIDENT nasce come sintesi tra l'oggetto tecnico e l'oggetto architettonico, è un sistema che consente una grande libertà espressiva. PRESIDENT è composto da profili in legno massello o alluminio abbinati a pannelli fonoassorbenti scorrevoli, sovrapponibili, modulari e implementabili. L'ampia scelta di dimensioni e finiture rende il sistema facilmente configurabile e adattabile a qualsiasi ambiente grazie alle infinite possibilità di abbinamento.

Philippe Nigro

GB\_Sound, like light, must be controlled and designed attentively lest it become irritating. Even while it may be beautiful, sound can turn into noise thereby eroding the quality of life in a room. PRESIDENT was designed as the amalgamation of technical object with architectonic object; its design allows enormous expressive freedom to the architect. PRESIDENT is comprised of solid wood or aluminium profiles paired with sliding, sound-absorbing panels that can be overlapped and are modular and versatile. The wide selection of dimensions and finishes makes the President line easy to configure and adaptable to any space, owing to the infinite opportunities to mix and match.

Philippe Nigro

F\_Tout comme la lumière, le son peut, à moins d'être contrôlé et conçu avec attention, devenir fastidieux et se transformer en bruit au détriment de la qualité de vie dans un endroit donné, pour beau qu'il puisse être. PRESIDENT voit le jour comme une synthèse entre l'objet technique et l'objet architectonique, un système qui permet une grande liberté d'expression. PRESIDENT est composé de profils en bois massif ou aluminium unis à des panneaux insonorisés coulissants, superposables, modulaires, ouverts à toute multiplication. Le choix important de dimensions et de finitions permet au système de se configurer et de s'adapter facilement à n'importe quel environnement grâce à ses possibilités infinies de composition.

Philippe Nigro

D\_Klang kann genauso wie Licht stören, wenn er nicht genau geplant und kontrolliert wird und sich in Lärm verwandeln, der die Lebensqualität jedes noch so schönen Raums beeinträchtigen kann. PRESIDENT entstand aus der Symbiose zwischen dem technischen und dem architektonischen Gegenstand und ist ein System, das viel Ausdrucksfreiheit lässt. PRESIDENT vereint Profile in Massivholz oder Aluminium mit verschiebbaren schalldämpfenden Paneelen, die im Baukastensystem übereinander gesetzt und implementiert werden können. Eine breite Auswahl an Größen und Arten von Finish erlauben es, das System leicht an jeden Raum anzupassen, da es unzählige Kominationsarten gibt.

Philippe Nigro

E\_El sonido, al igual que la luz, si no se controla y proyecta atentamente puede convertirse en algo molesto, se transforma en ruido, con menoscabo de la calidad de vida de un lugar, por muy hermoso que sea. PRESIDENT nace como síntesis entre el objeto técnico y el objeto arquitectónico, es un sistema que permite una gran libertad de expresión. PRESIDENT consta de perfiles de madera maciza o aluminio combinados con paneles fonoabsorbentes deslizantes, yuxtaponibles, modulares e implementables. El amplio surtido de dimensiones y acabados hace que el sistema sea fácil de configurar y adaptar a cualquier ambiente, gracias a las infinitas posibilidades de combinación.

# PRESIDENT

Snowsound® technology

I\_PRESIDENT è un sistema brevettato di pannelli fonoassorbenti, ideato per creare boiserie, composto da travi orizzontali con doppio binario, disponibili in legno massello o in alluminio lucido, e da pannelli fonoassorbenti Snowsound® in diversi formati e colori. E' un sistema modulare, liberamente configurabile, che permette di realizzare, con la sua varietà di dimensioni e colori, piccole e grandi installazioni.

GB\_PRESIDENT is a patented system of sound-absorbing panels, designed to create wall panelling, made up of horizontal beams with double track, available in solid wood or in polished aluminium, and by Snowsound® sound-absorbing panels in a variety of formats and colours. This modular system can be configured at will, making it possible to combine different sizes and colours, for small and large installations.

F\_PRESIDENT est un système breveté de panneaux phono-absorbants, conçu pour créer des boiseries, composé de lattes horizontales à double rail, disponibles en bois massif ou en aluminium poli, et de panneaux phono-absorbants Snowsound® en différents formats et couleurs. Il s'agit d'un système modulaire, que l'on peut configurer librement et qui permet de réaliser, grâce à sa variété de dimensions et de coloris, de petites et grandes installations.

D\_PRESIDENT ist ein patentiertes System von akustisch wirksamen Paneelen, das für Wandverkleidungen entwickelt wurde; es besteht aus horizontalen Profilen mit Doppelschiene und ist sowohl in Massivholz als auch glänzendem Aluminium erhältlich. Die schallabsorbierende Snowsound®-Pannee bieten eine große Auswahl an Formaten und Farben. Es handelt sich um ein modulares System, das frei konfigurierbar ist und dank dem man, durch die Vielseitigkeit an Größen und Farben, kleine und große Installationen realisieren kann.

E\_PRESIDENT es un sistema patentado de paneles fonoabsorbentes, concebido para crear boiseries, compuesto por vigas horizontales de dos carriles, que pueden ser de madera maciza o aluminio brillante y por paneles fonoabsorbentes Snowsound® de diferentes formatos y colores. Es un sistema modular, configurable libremente, para armar pequeñas y grandes instalaciones con colores y tamaños variables.

I\_PRESIDENT permette di variare l'assorbimento acustico in un ambiente semplicemente facendo scorrere i pannelli Snowsound® lungo i binari: allontanando oppure sovrapponendo i pannelli si possono ottenere diverse prestazioni di assorbimento acustico alle varie frequenze.

GB\_With PRESIDENT, you can vary the sound absorption in a room by simply sliding the Snowsound® panels along the tracks: by either separating or overlapping the panels, a range of sound absorption can be achieved at the various frequencies.

F\_PRESIDENT permet de varier l'absorption acoustique d'une pièce en faisant simplement glisser les panneaux Snowsound® sur les rails: en éloignant ou en superposant les panneaux on peut obtenir différentes prestations d'absorption acoustique aux différentes fréquences.

D\_PRESIDENT ermöglicht das Variieren der akustischen Wirkung in einem Raum, einfach dadurch dass man die Snowsound®-Paneele an den Schienen entlang gleiten lässt: indem man die Paneele auseinander schiebt oder übereinander positioniert, erzielt man unterschiedliche Leistungen der Schallabsorption bei verschiedenen Frequenzen.

E\_Con PRESIDENT se puede ajustar la absorción acústica en un local sencillamente deslizando los paneles Snowsound® por los carriles: alejándolos o superponiéndolos se consiguen diferentes niveles de absorción acústica conforme a las distintas frecuencias.

I\_La possibilità dei pannelli di scorrere lungo i binari consente di nascondere oggetti presenti sulle pareti.

GB\_Panels run along tracks to conceal objects located along the walls.

F\_La possibilité de faire glisser les panneaux sur des rails permet de cacher des objets présents sur les murs.

D\_Die entlang der Schienen verschiebbaren Paneele erlauben es, an der Wand vorhandene Gegenstände zu verbergen.

E\_Deslizando los paneles por los carriles se pueden ocultar los objetos que están en las paredes.
