

SNOWALL

Caimi Lab

I_SNOWALL è composto da un feltro di poliestere al quale viene applicato mediante un particolare sistema di fissaggio un tessuto in poliestere Trevira CS®. Il rivestimento in tessuto del feltro e l'assenza di intercapedini tra i due materiali, riducono notevolmente la possibilità di accumulare polveri, pollini o di ospitare insetti.

GB_SNOWALL is made up of polyester felt paired with a polyester Trevira CS® material using a unique application system. The felt lining and the absence of space between the two materials significantly reduces its propensity to attract dust, pollen and insects.

F_SNOWALL est composé d'un feutre en polyester auquel est appliqué, par un système de fixation particulier, un tissu en polyester Trevira CS®. Le revêtement en tissu du feutre et l'absence d'interstices entre les deux matériaux, réduisent considérablement la possibilité d'accumuler des poussières, des pollens ou d'abriter des insectes.

D_SNOWALL besteht aus Polyesterfilz, der durch ein besonderes Applikationsverfahren mit dem Polyesterstoff Trevira CS® kombiniert wird. Der Unterstoff aus Filz sowie die Tatsache, dass zwischen den beiden Materialien keine Zwischenräume bestehen, reduzieren die Anfälligkeit für Staub-, Pollen- bzw. Insektenansammlung.

E_SNOWALL está compuesto por un fieltro de poliéster al que se le aplica, mediante un sistema de fijación especial, un tejido de poliéster Trevira CS®. Forrando el fieltro con el tejido sin dejar intersticios entre los dos materiales, se limita notablemente la posibilidad de que se acumule polvo, polen o que se alojen insectos.
